Explore Transfer Online Resources

Transfer information is one click away! Do your research so that you can make informed decisions about your future

City University of New York
www.cuny.edu
This is the central website for all CUNY colleges. It lists information from each college, such as majors, special programs, and library databases for research. All information related to the CUNY admissions application process, including the CUNY transfer application, can be found on this website by accessing the CUNY portal. Before applying for transfer, please read the “Before you Apply to CUNY” section (http://www.cuny.edu/admissions/undergraduate/prepare.html). This section provides detailed information on how to correctly complete the application.

CUNY TIPPS
www.tipps.cuny.edu
The CUNY Transfer Information and Program Planning System, called CUNY TIPPS, is a website designed to help CUNY students obtain information that will help them (1) select the CUNY college that offers the right academic program for them, and (2) plan a smooth transfer from an associate degree program to a bachelor’s program.

Features of the TIPPS website

Registered Academic Programs.
This section includes program titles, colleges where programs are offered, degrees granted, and additional certification and licensing information for both undergraduate and graduate programs within CUNY.

Course-to-Course Transfer Evaluations.
Find out how associate degree courses are evaluated by each of the CUNY senior colleges. Students can use this site to plan their programs of study and to ensure that the courses they take will transfer for maximum credit and speed them towards the completion of their baccalaureate degree.

BMCC Transfer Informational Sessions
www.bmcc.cuny.edu/advisement
Each semester the Academic Advisement & Transfer Center (AATC) hosts a series of information sessions and transfer events. The information sessions are conducted by admissions representatives so that students can get information directly from the college. It is best to attend the transfer event and bring your questions and research transfer.

Preparation for an Information Session

I. Visit the website of the college to familiarize yourself with their structure and curriculum.

II. Write down any questions you may have from your research and bring them to the session.

III. Arrive promptly at the information session so that you can secure a seat and not miss out on any important information, such as the name of the presenter and an overview of the institution.
Hi,
I am a student at BMCC and I was told by my advisor that I have to earn a grade of C or better in a Math credit-bearing course if I want to transfer. I enjoy math but it is really difficult for me. I always got a C– in high school math and I am not sure I can pull off a C in a college level math course. I’m dreading taking my math class. HELP! What should I do?

Sincerely,
Jamie, A Concerned Student

The student that you were in high school doesn’t necessarily reflect the type of student you are in college. You may look at Math with fresh eyes and there is always tutoring.

Once you decide to take the Math course, plan ahead! The key is to create an academic semester schedule that will allow you to dedicate a significant amount of time to learning mathematical concepts.

It is best to register for a math class as early as possible in your academic career at BMCC. Then purchase the book so that you are able to read through the beginning chapters and familiarize yourself with the type of Math you will be learning. Always ask for help in the Math Lab, room S-511.

The courses you take at BMCC are as important to the transfer process as how well you do in them. Use your professors and the tutors as resources when you feel you do not understand the material.
